Key Responsibilities

- 1. Assist with the planning, preparation for and management of, activities pertaining to maintaining, testing, diagnosing, repairing and replacing PV system electrical components which will include the following:
 - Investigate technical failures and prepare formal report
 - Participate in ensuring that contractors comply with HSE requirements
 - May require standby duties
 - Prepare Requests for Quotes as needed, to source service providers or purchase goods
 - Report significant events to the relevant Solar PV Technician(s), Line Manager and/or Plant Manager.
- 2. Assist Solar PV Technician(s) with monthly inspections.
- 3. Participate in the compilation of data for weekly and/or monthly reports.
- 4. Assist HSE&Q Officers with tasks, as required.
- 5. Assist with conducting site visits and specific induction sessions.
- 6. Participate in general site administrative duties.
- 7. Any other duties, as assigned by the Line Manager and Solar PV Technician(s), in line with the role.

Skills and Competencies

- 1. Able to troubleshoot and analyze data including following various types of process charts, schematics, single line diagrams
- 2. Good written and oral communication skills
- 3. Well-organized and responsive in all communications including clear, concise emails
- 4. Good team player; able to balance team and individual responsibilities
- 5. Good presentation skills
- 6. Able to manage stress and high-pressure situations
- 7. Able to handle multiple projects, prioritize work and work effectively under limited supervision.

Experience, Knowledge and Qualifications

- 1. Minimum of a N4 Electrical Certificate or a National Diploma in Mechatronic or Electrical Engineering, with only experiential learning outstanding.
- 2. Some understanding of PV plants is an advantage.
- 3. A basic understanding of:
 - Switching LV, MV and HV systems
 - Lock-out tag-out procedures
 - Power system protection.
- 4. Working knowledge of Microsoft Office packages including Outlook, PowerPoint, Word and Excel.
- 5. Able to read and interpret single line diagrams and schematics.
- 6. Able to analyse data, investigate and report on trends.
- 7. A basic understanding of general SCADA systems.
- 8. General ERP/CMMS knowledge: SAP, Ellipse, SAGE, Maximo, etc.
- 9. A basic understating of PLC troubleshooting and maintenance would be advantageous.
- 10. Able and willing to work in an outdoor environment.
- 11. Code B driver's license is an advantage.
